Proctoring report - candidate e2e_candidate

Session 7e24b50b6de8 | 2026-10-15 11:06:13 | mode recorded | profile v2

INVALID (FAIL)

Prohibited object detected (31.5% of samples, longest confirmed event 4.0 s)

- Voice does not match the enrolled candidate (22.8% of seconds, longest confirmed event 2.9 s)
- Evidence threshold exceeded: voice (22.8% > 5% of session), prohibited objects (1 event(s), limit any detection), multiple faces (14.2% > 5% of session)

Overall score 100.0 / 100 = sum of the violation points (multiple persons 35.0 + prohibited object 35.0 + voice mismatch 30.0 + speech detected 1.1 + suspicious sound 1.0), capped at 100 (raw 102.1). Score >= 50 -> INVALID, >= 15 -> SUSPICIOUS; critical violations (multiple persons, prohibited objects, identity, face spoofing, voice) weigh most, head pose little and eye gaze least.

Violation score

100.0

of 100

Video analysed	Audio	Events
13 s, 127 samples @ 10.00/s	ok, 13 s, speech 6.2 s	7 (baseline yaw -15.3, pitch 11.0, roll 2.6 deg)

Assessment and evidence fusion

- Assessment: REVIEW_REQUIRED - review priority high; verdict INVALID, risk score 100.0 / 100.
- Events: 5 confirmed, 2 uncertain, 0 filtered, 0 unavailable.
- Evidence families that contributed points: Another person in view, Prohibited objects, Voices and speech, Environment sounds.
- 1 corroboration(s) between independent audio and video signals.
- Detector scores (YOLO, YAMNet, similarity, liveness) are not calibrated probabilities; the risk score is a rule-based summary of validated events, not a probability of misconduct.
- Audio quality is only measured for speaker decisions (speech fraction); whispering and sound events have no per-event quality measure.
- The risk score summarises validated detector events; it is not proof of misconduct. A reviewer must read it together with the exam rules and the evidence.

Evidence family	Members	Confirmed	Uncertain	De-dup. s	Points
Identity / presentation attack	identity mismatch, face spoof (priority de-dup.)	0	0	0.0	0.0
Another person in view	multiple persons	1	0	0.0	35.0
Prohibited objects	prohibited object	1	0	0.0	35.0
Face presence	face not visible	0	0	0.0	0.0
Head and gaze orientation	head pose deviation, gaze away (priority de-dup.)	0	2	0.0	0.0
Voices and speech	voice mismatch, multiple speakers, whispering, speech detected (priority de-dup.)	2	0	1.0	31.1
Environment sounds	suspicious sound	1	0	0.0	0.9

Scoring

Overall score 100.0 / 100 - INVALID. Overall score 100.0 / 100 = sum of the violation points (multiple persons 35.0 + prohibited object 35.0 + voice mismatch 30.0 + speech detected 1.1 + suspicious sound 1.0), capped at 100 (raw 102.1). Score >= 50 -> INVALID, >= 15 -> SUSPICIOUS; critical violations (multiple persons, prohibited objects, identity, face spoofing, voice) weigh most, head pose little and eye gaze least.

Violation	Severity	Points	Explanation
multiple persons	critical	35.0 / 35	11 raw detection(s), 0 filtered; 1 merged event(s): 1 confirmed, 0 unconfirmed (1.8 s confirmed). Scored 1.8 s = 14.2% of the 12.7 s monitored. Full 35 points at 10% or more, so it reaches the cap: 100% of 35 = 35.0. Score 35.0 of 35 points (critical severity).
prohibited object	critical	35.0 / 35	40 raw detection(s), 0 filtered; 1 merged event(s): 1 confirmed, 0 unconfirmed (4.0 s confirmed). Scored 4.0 s = 31.5% of the 12.7 s monitored. Full 35 points at 10% or more, so it reaches the cap: 100% of 35 = 35.0. Score 35.0 of 35 points (critical severity).
voice mismatch	critical	30.0 / 30	6 raw detection(s), 0 filtered; 1 merged event(s): 1 confirmed, 0 unconfirmed (2.9 s confirmed). Scored 2.9 s = 22.8% of the 12.6 s monitored. Full 30 points at 10% or more, so it reaches the cap: 100% of 30 = 30.0. Score 30.0 of 30 points (critical severity).

Violation	Severity	Points	Explanation
speech detected	low	1.1 / 6	3 raw detection(s), 0 filtered; 1 merged event(s): 1 confirmed, 0 unconfirmed (1.4 s confirmed, 1.0 s already scored by a correlated violation). Scored 0.5 s = 3.8% of the 12.6 s monitored. Full 6 points at 20% or more, so 3.8/20 = 19% of 6 = 1.1. Score 1.1 of 6 points (low severity).
suspicious sound	low	1.0 / 6	2 raw detection(s), 0 filtered; 1 merged event(s): 1 confirmed, 0 unconfirmed (2.4 s confirmed, 2.0 s tolerated by the grace budget). Scored 0.4 s = 3.2% of the 12.6 s monitored. Full 6 points at 20% or more, so 3.2/20 = 16% of 6 = 1.0. Score 1.0 of 6 points (low severity).
identity mismatch	critical	0.0 / 40	Did not occur - 0 of 40 points.
face spoof	critical	0.0 / 40	Did not occur - 0 of 40 points.
multiple speakers	critical	0.0 / 30	Did not occur - 0 of 30 points.
whispering	critical	0.0 / 20	Did not occur - 0 of 20 points.
face not visible	medium	0.0 / 12	Did not occur - 0 of 12 points.
head pose deviation	low	0.0 / 10	13 raw detection(s), 0 filtered; 1 merged event(s): 0 confirmed, 1 unconfirmed (0.0 s confirmed). Nothing left to score - 0 of 10 points.
gaze away	very low	0.0 / 4	11 raw detection(s), 0 filtered; 1 merged event(s): 0 confirmed, 1 unconfirmed (0.0 s confirmed). Nothing left to score - 0 of 4 points.

Session violation and evidence counters

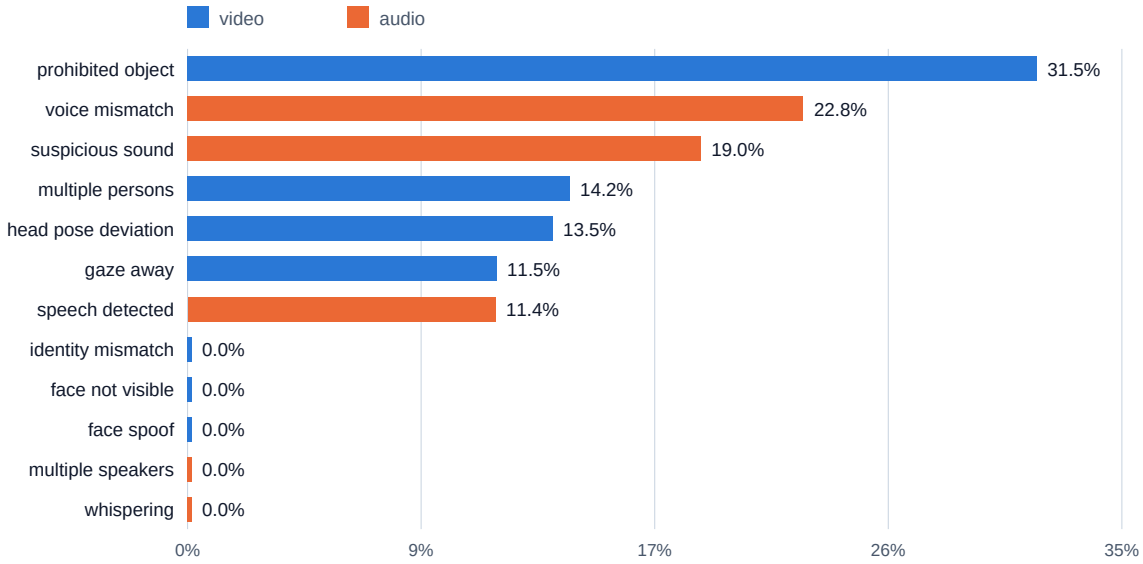

SESSION MARKED AS VIOLATED - limits exceeded for: voice, object, multiple faces

Group	Events	% of session	Limit	Exceeded	Upload	Target / reason

Thresholds used

- Head pose (adaptive, calibration calibrated, confidence normal, 29 of 31 calibration samples accepted): thresholds yaw/pitch/roll 17.2/9.07/8.97 deg at calibration, 17.18/9.08/8.99 deg at the end; baseline -15.33/11.0/2.6 deg, for 1.0 s (method template)
- Gaze: 22.0 deg horizontal / 25.0 deg vertical, for 1.0 s
- Face match threshold (cosine): 0.415; voice match threshold: 0.72
- Objects: Cell Phone >= 0.35, Book >= 0.4, Laptop >= 0.5, Extra Screen >= 0.5
- Session violated when: head pose > 25% of session, multiple faces > 5% of session, voice > 5% of session, object any detection, spoof any detection
